Load Bearing Vest
For BodyWorn Camera

MOAB BWC

- Unlike other armor manufacturers Accushape Armor uses LE input to design true functional carriers without demanding you buy addition ballistic panels for every carrier. Cost reduction with increased functionality.
- Each of these carriers can be customized to fit your departments specific needs.
- Using an advanced photo algorithm program, we make custom carriers to fit your existing non-Accushape Armor that has not expired. Creating a consistent image without the need to replace all your ballistic panels.
